## SUPPLEMENTUM.

---

*Lycopus exaltatus*.—L. foliis basi pinnatifido-serratis, laciniiis integerrimiis subserratisque, calycibus spinescentibus.—

*Willd. sp. pl. 1. p. 121.*

Icon. *Fl. grec. t. 12.*

In low shady woods : Virginia to Carolina ; rare. ♀. July, Aug. v. v. ; v. s. in *Herb. Sherard.* From three to six feet high. This species I omitted for want of a specimen in my Herbarium, though I found it myself in Virginia ; but seeing a specimen of Catesby's in the Sherardian Herbarium, I was convinced of its being a real American species.

*Monarda rugosa*.—M. glabriuscula ; capitulis mediocribus subsimplicibus, bracteis exterioribus ovatis undulatis pilosis, calycibus corollisque glabris, lacinia media labii inferioris bidentata, foliis ovatis subcordatis acutis rugosis, nervis subtus petiolisque pilosis, caule acutangulo glabriusculo.—*Willd. sp. pl. 1. p. 125.*

In Canada and on the mountains of Virginia. ♀. July — Sept. v. v. in *Hort. Lambert.* About four feet high ; flowers small, white.

*Valeriana dioica*.—V. glabra ; foliis radicalibus subspathulato-ovatis integris longissime petiolatis, caulinis paucis pinnatifidis, laciiniis lanceolatis integerrimiis subdentatis que obtusiusculis.—*Willd. sp. pl. 1. p. 176.*

Icon. *Fl. dan. 687.*

In swamps at Hudson's Bay. *Tilden.* ♀. June. v. s. in *Herb. Sherard.* About a span high ; flowers flesh-coloured.

*Fedia chenopodifolia*.—F. dichotoma ; foliis ovatis acutis inferne dentatis, cymis nudis divaricato-dichotomis, filamentis longis.

VOL. II.

2 B

page 16.

p. 17.

p. 28.

*Plantago elongata*.—P. foliis linearibus integerrimis glabris, scapo spicis elongatis subimbricatis foliis longioribus, bracteis ovatis acutis margine membranaceis.

p. 99.

In Upper Louisiana. *Bradbury*. v. s. in *Herb. Bradbury*. Resembles *P. pauciflora*.

*Pulmonaria lanceolata*.—P. glabra, erecta; foliis radicalibus longissime pedicellatis lanceolatis, caulinis linearibus oblongis, floribus subpaniculatis, calycibus abbreviatis.

p. 131.

In Upper Louisiana. *Bradbury*. 4. v. s. in *Herb. Bradbury*. Flowers small, resembling those of *P. paniculata*.

*Pulmonaria sibirica*.—P. calycibus abbreviatis, foliis radicalibus cordatis. *Willd. sp. pl. 1. p. 770.*

*Anchusa*. *Gmel. sib. 4. p. 75. no. 15. t. 39.*

In Canada. *Masson*. 4. July. v. s. in *Herb. Lambert*.

Flowers purple, in terminal corymbs; it resembles *P. virginica* very much.

*Cynoglossum glomeratum*.—C. hispidum; foliis spatulatis obtusis, floribus glomeratis.

p. 133.

*C. glomeratum*. *Fraser. catal. 1813.*

In Upper Louisiana. *Bradbury*. 4. v. s. in *Herb. Bradbury*.

*Lysimachia lanceolata*.—L. glaberrima; foliis quaternis subpetiolatis lanceolatis promisse acuminatis, pedunculis quaternis multifloris, floribus summis racemosis, corollæ lacinii ovatis acutis, caule erecto simplici.

p. 135.

*L. caroliniana quadrifolia*, foliis acutis, *Herb. Sherard*.

In Carolina. *Catesby*. 4. v. s. in *Herb. Sherard*.

Flowers the size of *L. vulgaris*.

*Calystegia Catesbeiana*.—C. volubilis, tomentosa; foliis oblongis sagittatis acuminatibus, pedunculis unifloris folio brevioribus, bracteis ovalibus obtusis calyce longioribus.

p. 143.

In Carolina. *Catesby*. v. s. in *Herb. Sherard*. Flowers large, purple.

*Calystegia paradoxa*.—C. humifusa, tomentosa; foliis oblongis cordato-sagittatis acutis, pedunculis unifloris elongatis folio longioribus, bracteis a flore remotis linearibus, calycibus nudis glabris acuminatis.

*Convolvulus virginianus*, laeviter hirsutis et oblongis foliis, flore maximo albicante. *Pluk. mant. 54. secundum Herb. Sherard*.

- Icon. *Fl. dan.* 435. *Engl. bot.* 938. *Lam. illustr.* t. 92.  
In fields: Pennsylvania to Virginia. Probably introduced.  
⊖. June, July. v. v. Flowers blue.
2. *L. pusilla*, hispidissima; foliis inferioribus spathulatis, superioribus linear-i-oblongis integerrimis, racemis solitariis, floribus pedunculatis.—*Willd. sp. pl.* 1. p. 781.  
In dry woods and on road sides: Pennsylvania to Virginia.  
⊖. May—July. v. v. Flowers white, very small.

*virginica.*

163. CYNOGLOSSUM. *Gen. pl.* 243.
1. *C. mollissime* pubescens; foliis lato-lanceolatis sessilibus, racemis paniculatis.—*Willd. sp. pl.* 1. p. 760.  
Icon. *Curt. lond.* 4. t. 16. *Bot. mag.*  
In dry woods, in the lime-stone countries, frequent. ♂.  
June, July. v. v. Flowers brownish-red.
2. *C. nudiusculum*; foliis spathulato-lanceolatis lucidis sub-tus scabris, racemis sparsis. *Smith fl. brit.* 1. p. 216.  
*C. virginicum.* *Willd. sp. pl.* 1. p. 760.  
Icon. *Engl. bot.* 1642.  
In similar situations in Virginia. ♂. June, July. v. v.  
Flowers blueish-brown.
3. *C. hirsutissimum*; foliis ovali-oblongis, superioribus amplexicaulibus, corymbo terminali aphylo longe pedunculato. *Mich. fl. amer.* 1. p. 132.  
*C. foliis amplexicaulibus.* *Gron. fl. virg.* p. 24.  
*C. virginicum.* *Linn. sp. pl.* 134.  
In shady moist woods: Pennsylvania to Virginia. ♀.  
May—July. v. v. Flowers beautiful blue and white.  
Willdenow's *C. virginicum* is certainly not the plant alluded to by Linnæus in his *Species Plantarum*, by which he refers to Clayton's plant, which evidently is the present species.

*officinale.**sylvaticum.*

164. MYOSOTIS. *Gen. pl.* 240.
1. *M. perennis*; seminibus lœvibus, calycibus subovalibus glabris tubo corollæ fere longitudine, caule subramoso, foliis lanceolatis. *Roth. germ.* i. 87. ii. 221.  
*M. scorpioides.* *Willd. sp. pl.* 1. p. 746.  
Icon. *Fl. dan.* 583.  
In rivulets and ditches, frequent. ♀. May—Sept. v. v.
2. *M. annua*; seminibus lœvibus, calycibus ovalibus acuminate hirsutissimis tubo corollæ longioribus, caule ra-

*palustris.**arvensis.*
